**Rockford Metropolitan Agency for Planning (RMAP)
Annual Listing of Federally Obligated Projects for FY 2012
July 1, 2011 to June 30, 2012**

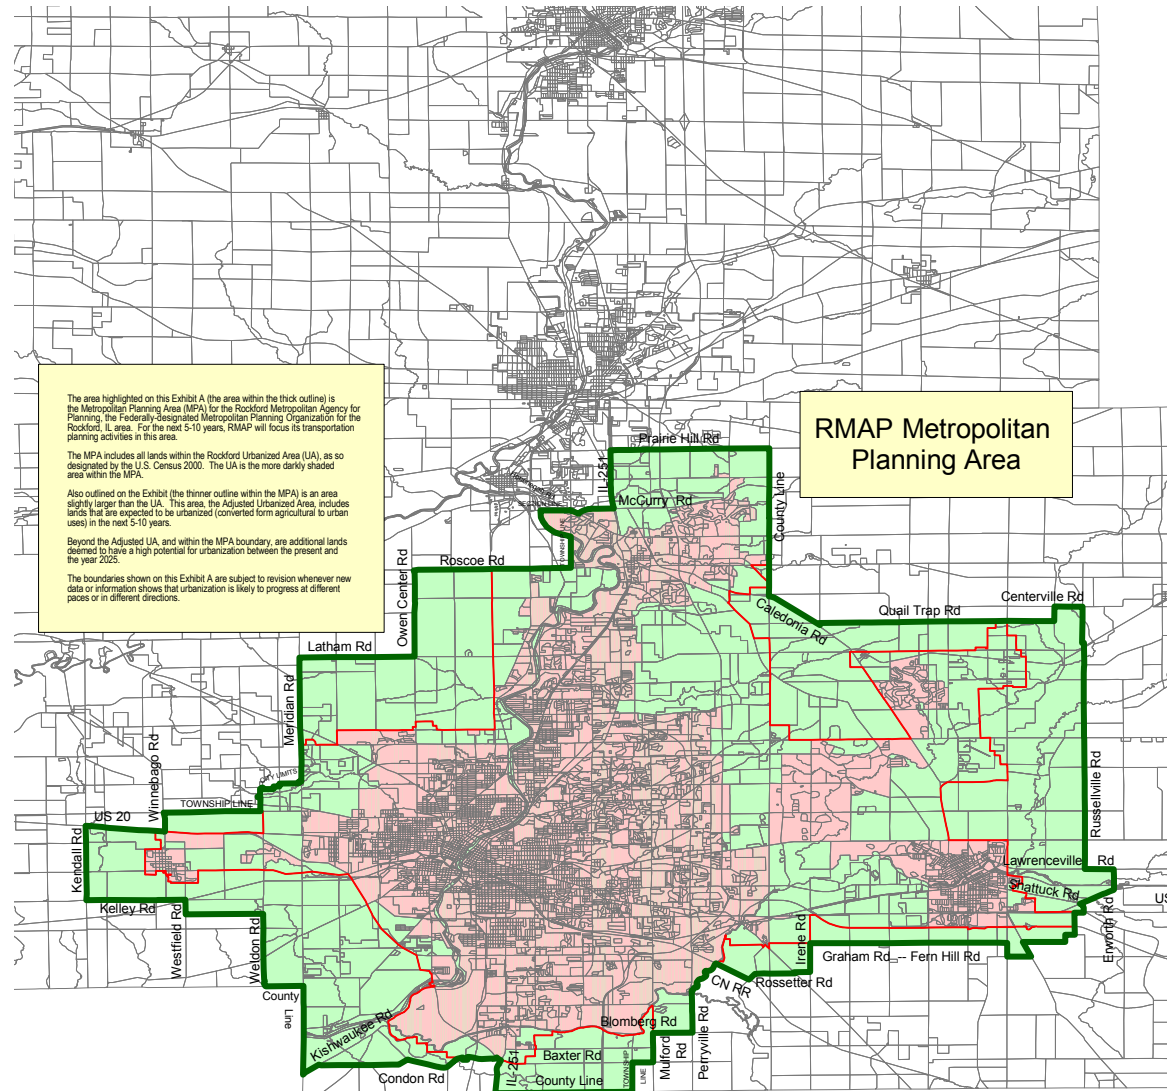

The Transportation Improvement Program (TIP) is a listing of transportation projects over a four year period. The annual listing of Federally Obligated Projects is a subset of the TIP, and concentrates on those projects that have dollars from federal sources. The information contained in this document will allow the reader to visually review and retrieve information specific to Federal transportation projects. These projects are broken into categories for ease of review. The categories cover all facets of transportation from planning to implementation and cover the spectrum of projects from highways, transit, rail, planning, bicycle/pedestrian and safety.

The Rockford Metropolitan Agency for Planning was formerly known as the Rockford Area Transportation Study and was established in 1964 as the Metropolitan Planning Organization, or MPO, for the Rockford region. The planning area for an MPO is determined by the Bureau of the Census. The RMAP planning area for Fiscal Year 2012 is depicted on the map to the right. The RMAP planning area includes the cities of Rockford, Loves Park and Belvidere, the villages of Machesney Park, Cherry Valley, Winnebago, Roscoe and Timberlane. The RMAP planning area is immediately adjacent to the State Line Area Transportation Study that covers the Beloit, WI metro area and includes the City of South Beloit and the Village of Rockton in Illinois.

The TIP and other RMAP documents can be obtained in hard copy format from the RMAP offices and in digital format from the RMAP website:
www.rmapil.org

Anyone who desires more information or has questions about this or any other MPO document or activity is encouraged to contact the RMAP staff:
Office: 815-964-RMAP (7627)

FTA/FHWA GUIDANCE ON ANNUAL LISTING OF OBLIGATED PROJECTS

Statutory Basis:

As revised by the SAFETEA-LU, 23 U.S.C. 134(j)(7)(B), 23 U.S.C. 135(g)(4)(B), 49 U.S.C. 5303(j)(7)(B), and 49 U.S.C. 5304(g)(4)(B) require "...an Annual Listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which Federal funds have been obligated in the preceding year shall be published or otherwise made available by the cooperative effort of the State, transit operator, and metropolitan planning organization for public review. The listing shall be consistent with the funding categories identified in each metropolitan transportation improvement program (TIP)."

This provision is intended to increase the transparency of government spending on transportation projects and strategies in metropolitan areas to State and local officials, and to the public at large. Realizing this objective involves promoting accuracy and responsiveness in financial planning and adoption of a proactive approach to sharing information with the public in a meaningful way, at an appropriate time, and in a user-friendly format.

Discussion of Key Terms and Concepts in Statutory Language:

Following are brief descriptions of statutory provisions that provide the basis for the key procedural elements and product qualities presented in this guidance.

Cooperative Process - SAFETEA-LU, like its predecessor legislation TEA-21, requires the metropolitan planning organization (MPO), State, and public transportation operator(s) to cooperate in preparing a list of projects for which Federal funds were obligated for spending during the immediately preceding year. This cooperation is essential because of the different responsibilities held by the organizations in planning, programming, and project implementation. The MPO presents information on the projected schedule and funding for projects contained in the transportation improvement program (TIP) based only upon what is received from implementing organizations. Similarly, up to date information on implementation of projects in the TIP is available only from those implementing organizations. Thus, the annual report of projects for which an obligation of funds took place must be a cooperative effort.

Metropolitan Area Focus - Although the Annual Listing of obligated projects provision appears in both metropolitan and statewide planning sections of the law, the applicability is limited to metropolitan areas. Statutory reference is made in conjunction with statewide TIPs, but only to the extent that those documents contain project information from metropolitan area TIPs. These two references in law are redundant and are not meant to require two separate project listings.

Content and Format of Project Listing – The project listings should align with categories included in the TIP. This includes project name, location, and other descriptive informa-

tion included in the TIP. The listing also should include the amount of funds programmed in the TIP, the amount obligated in the program year, and the amount of funds remaining and available for use in subsequent years. One approach to producing the listing in a user-friendly format is through the use of the public domain software package TELUS (Transportation, Economic, and Land Use System). TELUS is available as both a desktop and a web-based information-management and decision-support system designed for MPOs and state departments of transportation (DOTs) to manage TIPs and to carry out other transportation planning and programming requirements. TELUS also can be used to integrate and map a variety of MPO and state DOT data for analysis and report generation, including preparation of the Annual List of obligated projects. TELUS is available free of charge at <http://www.telus-national.org>.

Pedestrian and Bicycle Facilities – The Annual Listing must include obligations for projects in the TIP that were specifically identified as bicycle or pedestrian projects. For projects in the TIP that include bicycle and/or pedestrian facilities as an incidental part of a larger project, a reasonable effort should be made to identify the cost and general location of these facilities in the Annual Listing.

Timing of Publication - The Annual Listing should be completed and published within three months after the end of the program year. The list should also include visual components, such as maps and charts, to ensure that the information is understandable to a broad readership with varying levels of familiarity with transportation planning and programming concepts.

Program Year – The year for which project obligations are reported would be each MPO's previous program year. The program year can be a calendar year, the Federal fiscal year, the local fiscal year, or any other annual increment that MPOs and States choose for the TIP.

Obligated – Within this context, an obligation is the Federal government's legal commitment to pay the Federal share of a project's cost. An obligated project is one that has been authorized by the Federal agency and funds have been obligated. Projects for which funds have been obligated are not necessarily initiated or completed in the program year, and the amount of the obligation will not necessarily equal the total cost of the project. For FTA projects, obligation occurs when the FTA grant is awarded. For FHWA projects, obligation occurs when a project agreement is executed and the State/grantee requests that the funds be obligated.
